

Installing the Intune Company Portal App – Windows 10 Devices

The Intune Company Portal app will support the BYOD program in the following methods:

- Install a security certificate on the device to allow for Wi-Fi and web filtering to work correctly in school.
- Allow relevant apps and software to be downloaded and signed into on the school account.
- Allow easy access to other key links

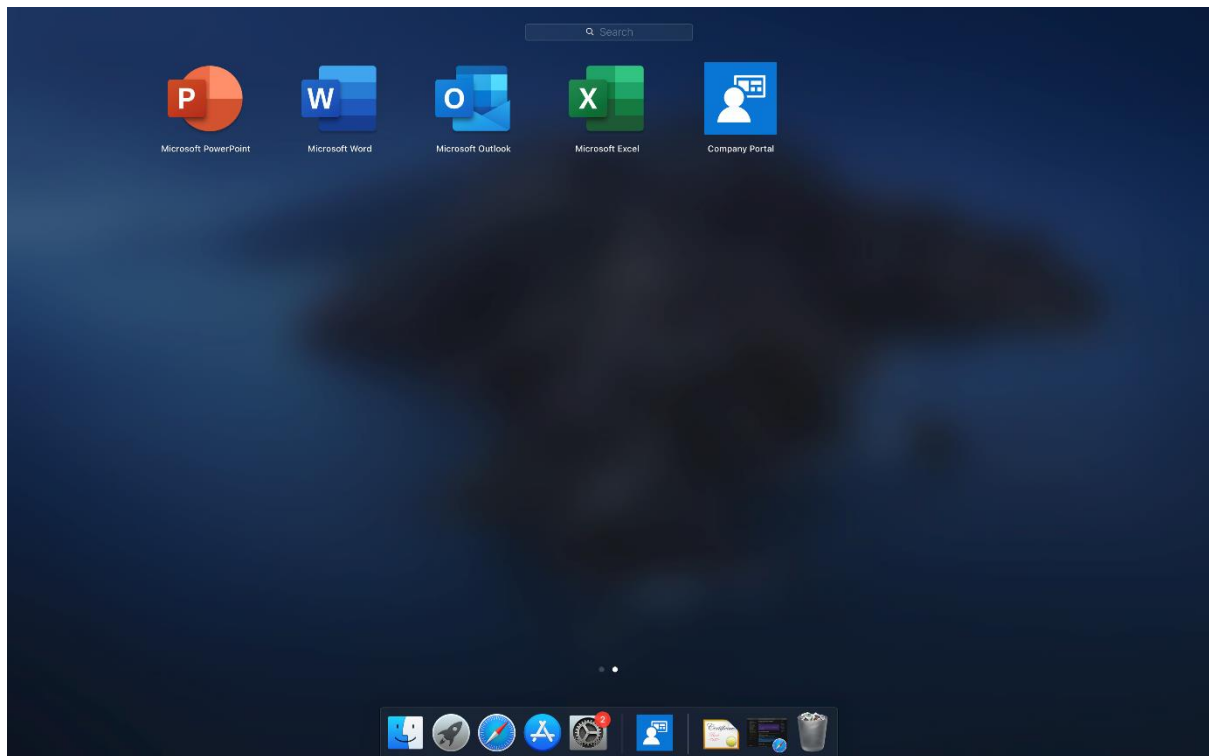

Please follow the steps below to install this on the BYOD laptop in preparation for use in school

Step 1 – Click the link below do download the Company Portal installer

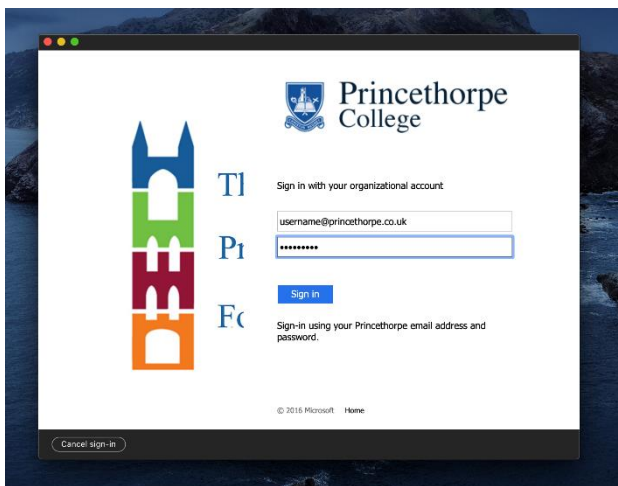

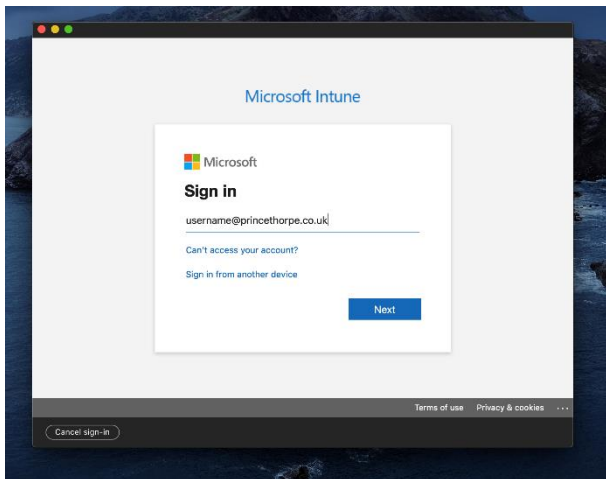

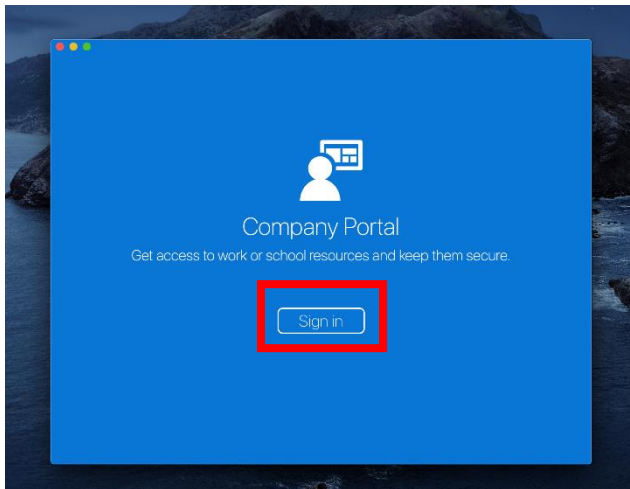

[Click here to download the Company Portal installer](#)

Step 2 – Open the installer by clicking on the downloaded file and follow the steps. Agree to the software license agreement and enter your device password or fingerprint to install the software.

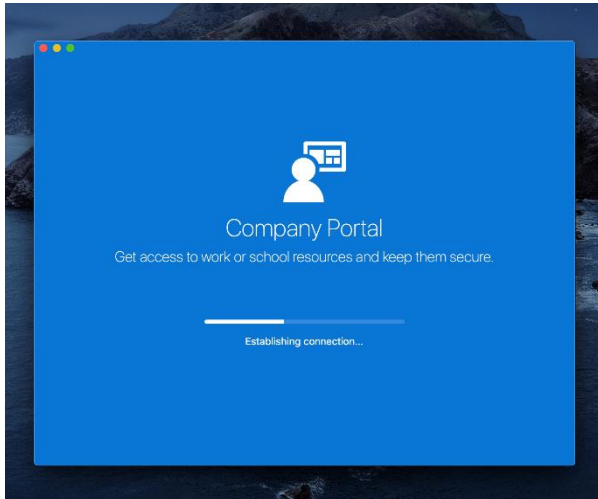

Step 3 – Open the Company Portal app from the launcher

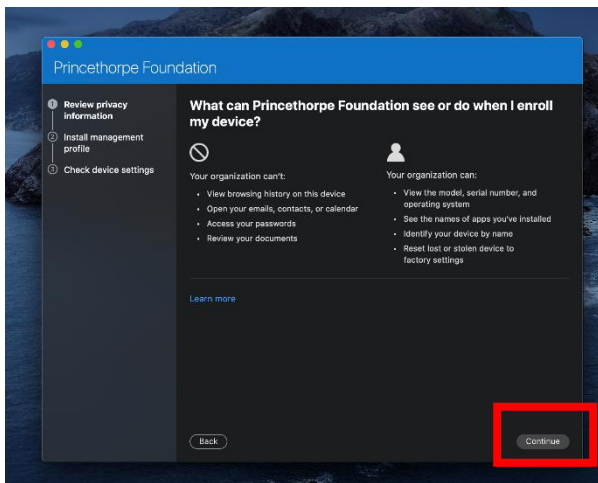

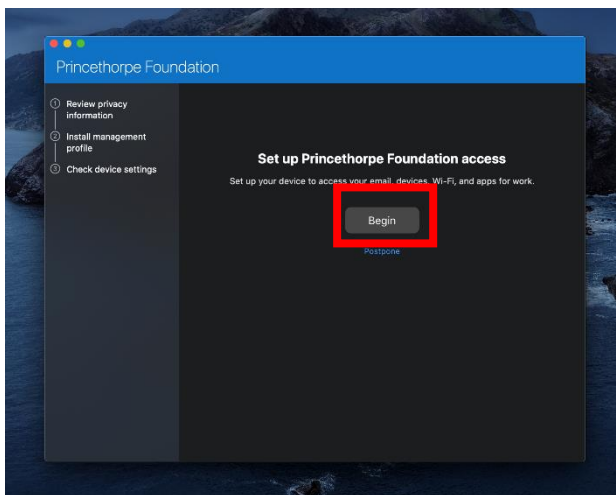

Step 4 – Click “Sign in” and then sign in with your Princethorpe username and password

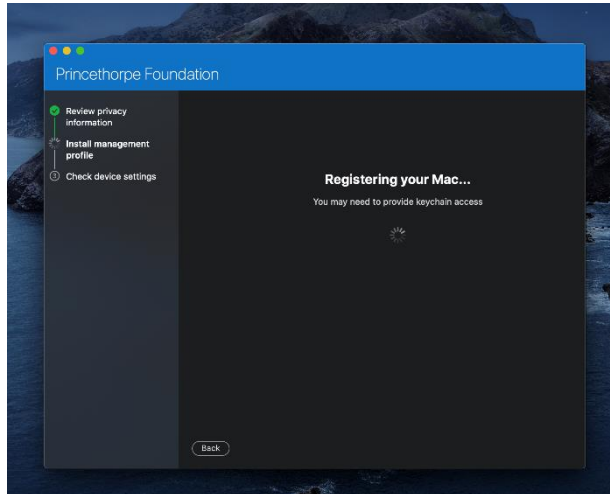

Step 5 – wait for the connection to establish

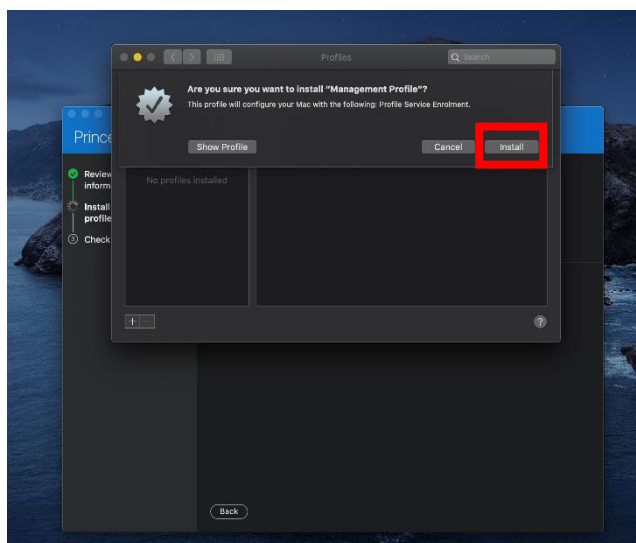

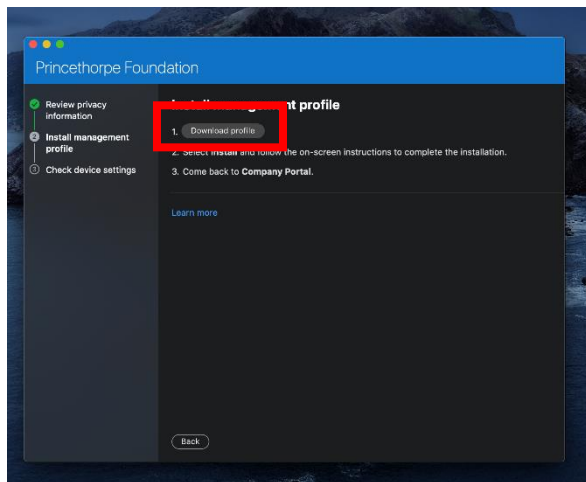

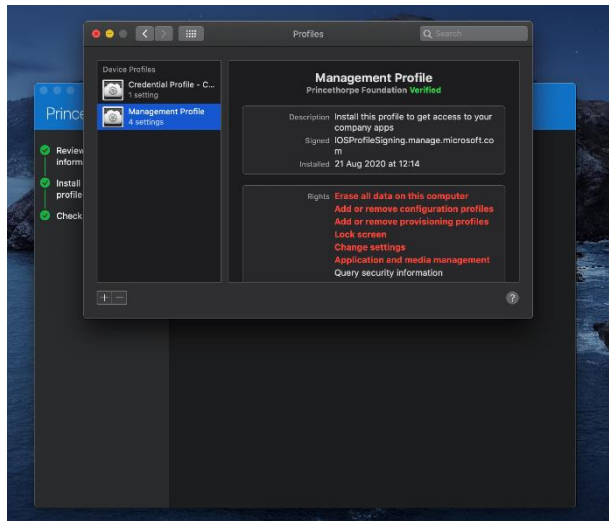

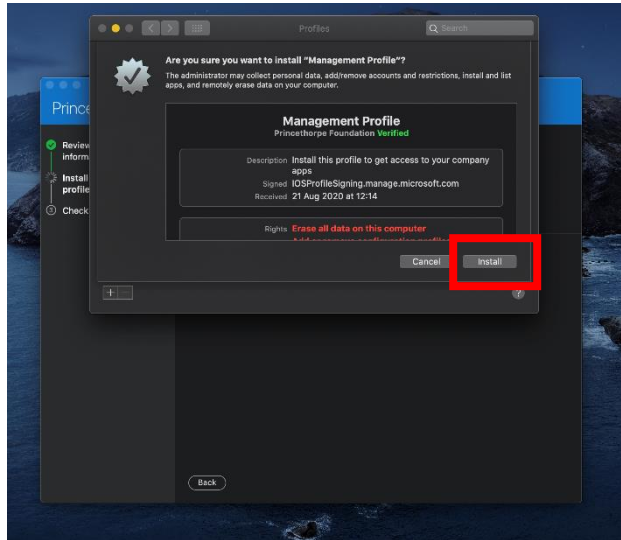

Step 6 – Click “Begin” and then “Continue” and wait for your Mac to be registered

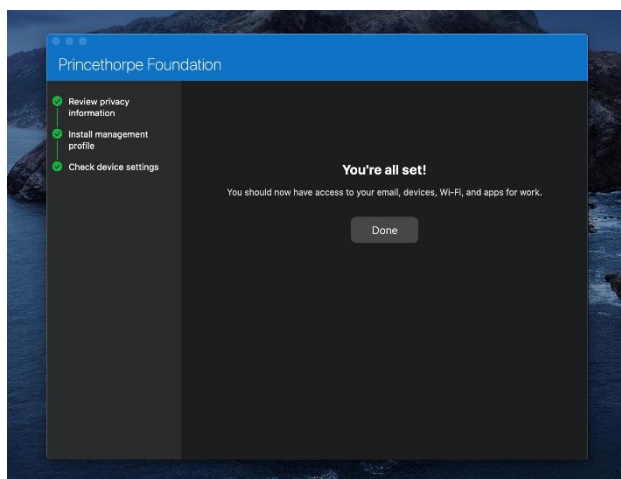

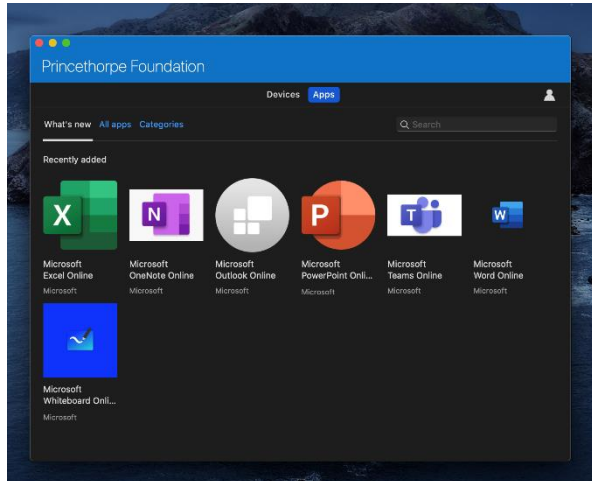

Step 7 – Click “Install management profile” and follow the instructions. Download the profile, select install and follow the onscreen instructions.

Step 8 – Click “Done”

Once you have completed this, the apps will download in the background and begin to appear in the launcher. They are also accessible from the Company Portal app. The security certificate will also automatically download and install in the background.

Once this is complete, the device is ready to use in school.
